Add an alarm

To add an alarm, click the **Alarm** check box. Specify how many minutes, hours or days before the event the alarm will ring. Enter the numbers directly or use the up- and down-arrows on the screen.

Start 11.03.2016 i 10 00 End 11.03.2016 12 00 Alarm 30 + minutes before +

If you want to add several alarms, click the **plus-button** and do the same as described above.

Add summary, route and description

In the Summary box, write a title for the event. This is mandatory. E.g. "Go to school".

Routes contain a list of the routes created with the Home Navigation app. If you want a specific route to be connected to this event, you can select it in the list. This is optional.

In the **Describe** box you can describe the event in more detail. E.g. "You need to get ready for school now". This is optional.

Create shopping list

When you have uploaded all of the products that you want the user to buy, you can create a shopping list. Click **Create shopping list**.

📽 All products	Create shopping	list 🧲		
Mi £	lik 1	Bread £ 1.2	Eggs £ 1.3	
List name		Total cost	£ 0	Create shopping list

Select the products that you want to add to the shopping list. You can increase the number of selected items by giving a number on the input field **Number**.

Type the **name** of the list, e.g. "Monday shopping". The total price of the selected products will be calculated automatically (here \pm 3.5). Finally, click **Create shopping list**.

The shopping list will be saved and made available on the user's mobile device through the Money Handling Assistance app (see screenshot of the app below).

Create a reminder

When you click **Create shopping list**, the web suggests that you create a calendar reminder for the shopping trip, including how much money the user must bring. You have three choices:

- 1. Create a reminder with the exact amount, i.e. the calculated amount (here £ 3.5).
- 2. Type the desired amount in the box and click **Create reminder with extra amount**.
- 3. Do not create a reminder. Click Cancel.

Monitor

The monitor can be used to view the position of the user, i.e. where the user is when using the Poseidon mobile app. It only works if this option is switched *on* in the mobile app.

Choose Monitor from the top menu. You can see the user's position on the map (here "Katrine").

On the bottom of the page, you can find information about the user's position described in text. You can also see how much battery is left on the user's mobile device.
